

CELLIPEX Emulsion Spécifique pour la Silhouette is one of the most complete and most effective anti-cellulite products ever developed. It is an extremely rich fluid-cream with a high concentration of selected ingredients and phyto-extracts with lipolytic (fat reducing) and diuretic (water reducing) properties.

Development of cellulite is closely linked to a lower than normal metabolic activity that leads to the accumulation of fat and to the hardening of adipose (fat) cells. The problem is caused and aggravated by excess water retention, which interferes with proper oxygenation and efficient elimination of toxins from the tissues. For this reason, the areas affected by cellulite generally have lower temperatures and slower metabolic rates. The characteristic “Orange Peel” effect and in advanced cases the unsightly “Saddlebags – *culotte de cheval*” are direct results of the atrophy of adipose cells.

CELLIPEX Emulsion Spécifique pour la Silhouette is specifically formulated to help renormalize the adipose tissue. One of its main functions is restoration of thermal equilibrium to accelerate local metabolism of fat. It also efficiently removes excess fluids and toxins from the tissues to minimize water retention.

CELLIPEX Emulsion Spécifique pour la Silhouette is ideal for legs, hips, buttocks, and abdomen. It profoundly tones the skin and gives it great elasticity and a deliciously soft, smooth feel.

Performance characteristics & active ingredients

CELLIPEX Emulsion Spécifique pour la Silhouette performs important dermatological functions as follows:

- **Intense diuretic action to reduce accumulations of water and toxins**

HEDERA HELIX (Ivy extract)
HUMULUS LUPULUS (Hops extract)
AGROPYRON REPENS (Couch grass extract)
BETULA ALBA (Birch extract)

- **Lipolytic action to reduce accumulations of fat**

SOLANUM MELONGENA (Eggplant extract)
POTASSIUM IODIDE

- **Stimulates capillary circulation to improve oxygenation, thermal equilibrium, and metabolism of adipose cells**

NIACINAMIDE (Vitamin B3)
ETHYL NICOTINATE

- **Reinforces the connective tissue and protects the integrity of cell membranes**

LECITHIN

- **Soothing, decongestant, and refreshing action**

SALICYLIC ACID
MENTHOL

Ingredients:

AQUA, ISODECYL CITRATE, C12-20 ACID PEG-8 ESTER, PROPYLENE GLYCOL, CETETH-10, PPG-25-LAURETH-25, HYDROXYPROPYL STARCH PHOSPHATE, BENZYL ALCOHOL, GLYCERIN, LAURETH-10, STEARETH-10, MYRETH-10, SODIUM CHLORIDE, SOLANUM MELONGENA FRUIT EXTRACT, SCLEROTIUM GUM, LECITHIN, DEHYDROACETIC ACID, ETHYL NICOTINATE, UREA, MAGNESIUM SULFATE, MENTHOL, SALICYLIC ACID, PARFUM, BETULA ALBA LEAF EXTRACT, HUMULUS LUPULUS FLOWER EXTRACT, POTASSIUM CHLORIDE, HEDERA HELIX LEAF EXTRACT, NIACINAMIDE, GLYCINE, AGROPYRON REPENS EXTRACT, POTASSIUM IODIDE, ZINC SULFATE, SODIUM THIOSULFATE.

Recommended use

CELLIPEX Emulsion Spécifique pour la Silhouette is an indispensable product for an intense anti-cellulite treatment. It can be used on all types and stages of cellulite; it is one of the few commercially available products that gives impressive results even on the most advanced forms of the problem.

CELLIPEX Emulsion Spécifique pour la Silhouette is offered both for professional and home use. In professional treatments it can be used after **CELLIPEX Masque** for a quick and very effective massage. For detailed information on **CHOLLEY Professional Anti-Cellulite & Slimming Treatments**, please consult the corresponding **Technical Notes**.

Application

CELLIPEX Emulsion Spécifique pour la Silhouette may be used morning and evening on the entire legs, from the calves all the way up to the hips and buttocks. Shake the bottle well before use and apply the product on clean, dry skin. For best results place one foot on a stool, using light circular motions in an upward direction, massage the legs until the emulsion is fully absorbed. Repeat the treatment several times a week. Visible and sustainable results are achieved with regular use. A temporary redness of the treated area is perfectly normal due to the stimulation of capillary circulation. The redness starts to fade after a short time. In case of persistent redness, irritation, itching or other discomfort, rinse the affected area with cool water.

CELLIPEX Emulsion Spécifique pour la Silhouette can be effectively combined with other **CHOLLEY** products such as:

CELLIPEX Silhouette Concentrate

BIOLASTON Firming Gel

BIOVENAC Detox & Refreshing Lait
