Recommended use

BIOCLEAN “S” Ampoules is an indispensable product for treatment of pimples and blackheads, especially if they are frequent and significant. It is a product that is highly beneficial during periods of major hormonal fluctuations such as: puberty, menopause, or acute stress. These instances are generally marked by an overproduction of testosterone that affects the composition and the viscosity of sebum.

BIOCLEAN “S” Ampoules is used in professional **BIOCLEAN** treatments as a purifying, soothing, and normalizing product. It should also be used regularly at home when the skin is tense and inflamed.
