

BIOCLEAN G3 Mask is part of the latest generation of **CHOLLEY** products. It is an exfoliating, purifying, and sebum-normalizing mask for oily, impure, and asphyxiated (dull) skins.

The peeling action of **BIOCLEAN G3 Mask** stimulates cellular regeneration by removing dead cells, and excess keratin to produce a softer and more harmonious epidermis. It absorbs deep-seated impurities that cause inflammations. This cleansing action helps:

1. Purify pores and hair follicles to prevent formation of comedones (pimples and blackheads)
2. Relieve swelling and congestion to diminish redness
3. Facilitates metabolic functions, oxygenation, and regeneration of the skin

The sebum normalizing and healing properties of **BIOCLEAN G3 Mask** are very significant. They help tighten dilated pores and regulate production and flow of sebum for a fresher, healthier, and smoother looking skin.

Performance characteristics & active ingredients

BIOCLEAN G3 Mask performs important dermatological functions as follows:

- **Exfoliating action for a smooth and harmonious epidermis**

KAOLIN
BENTONITE
ORYZA SATIVA
SALICYLIC ACID

Recommended use

BIOCLEAN G3 Mask is specifically formulated for oily and impure skins. It is also very beneficial for asphyxiated (dull, tired) skins, especially in the presence of blackheads. **BIOCLEAN G3 Mask** has significant skin healing and regenerating properties that make it suitable for treatment of acne and acne scars. It imparts a fresh smooth look to the epidermis and helps the skin breath more efficiently by liberating the pores and follicles.

Application

1. Thoroughly cleanse face, neck, and décolleté with **BIOCLEAN Lait**.
2. With fingertips apply a consistent layer of **BIOCLEAN G3 Mask** on the skin.
3. Let the mask rest 10-15 minutes.
4. Remove the mask with lukewarm water or a soft humid micro-fiber mitt.
5. Tone the skin with **BIOCLEAN Lotion**.
6. Complete the treatment with the application of a **CHOLLEY** cream appropriate for the type of the skin.

BIOCLEAN G3 Mask may be used once or twice a week as an exfoliating product for purification and conditioning of the skin.
