

The skin covering the breasts is slightly different from that of the rest of the body. Its adipose (fat) tissue is particularly well developed and it serves as a padding to protect the mammary glands. The connective tissue is thin but strong to ensure good support, firmness, and elasticity. The epidermis is thin, fragile, and very sensitive. A major problem for many women is “sagging of breasts” or ptosis, which is relaxation of support fibers caused by:

- shrinkage or enlargement of adipose tissue due to dieting or obesity
- pregnancy
- breast-feeding
- menopause and hormonal fluctuations

These instances are generally accompanied by formation of stretch marks.

SINUSTON Crème pour le Seins has been specifically formulated for firming, hydration, and toning of breasts. It is a highly refined cream with a lavish texture and a delicate perfume that is rich in hydrating factors, select phyto-extracts, precursors of collagen fibers, and vitamins to reinforce the tissues for greater support and elasticity.

SINUSTON Crème pour le Seins works superbly both for professional and home use. Thanks to its regenerating action and anti-oxidant properties, the cream delivers visible and impressive results, which make it an ideal anti-aging product for breasts. **SINUSTON Crème pour le Seins** is totally free from hormones. Its long term use has proven completely safe and without any undesired side-effects.

Performance characteristics & active ingredients

SINUSTON Crème pour le Seins performs important dermatological functions as follows:

- **Astringent action for a tighter, more compact skin to prevent “sagging of breasts”**
GALEGA OFFICINALIS (Goat's rue extract)
POTENTILLA ERECTA (Tormentil extract)
- **Antioxidant action to inhibit the damage caused by free radicals**
TOCOPHEROL
ASCORBYL PALMITATE
- **Stimulates cellular regeneration for greater support and firmness**
OLIGOPEPTIDE-5
RETINYL PALMITATE
ASCORBYL PALMITATE
RUTIN
- **Profound hydrating and emollient action to increase skin's elasticity and to prevent stretch marks**
PROPYLENE GLYCOL
PPG-3 MYRISTYL ETHER
ARACHIS HYPOGAEA (Peanut oil)
GLYCERIN
GLYCERYL STEARATE

Recommended use

SINUSTON Crème pour le Seins is a firming, hydrating, and emollient product for breasts that can be used by women of all ages. It is particularly beneficial in preventing relaxation of breasts (ptosis) as the result of: aging, menopause, pregnancy, and breast-feeding. It is also very effective in preventing stretch marks caused by a significant weight loss, or the end of a lactation period.

Ingredients:

AQUA, CETEARYL ALCOHOL, PROPYLENE GLYCOL, PPG-3 MYRISTYL ETHER, PARAFFINUM LIQUIDUM, SORBITOL, SODIUM CETEARYL SULFATE, POTASSIUM CETYL PHOSPHATE, GLYCERIN, BENZYL ALCOHOL, GLYCERYL STEARATE, HYDROGENATED C12-18 TRIGLYCERIDES, TOCOPHEROL, GALEGA OFFICINALIS EXTRACT, ARACHIS HYPOGAEA OIL, HYDROXYETHYLCELLULOSE, DEHYDROACETIC ACID, RETINYL PALMITATE, PENTAERYTHRITYL TETRA-DI-T-BUTYL HYDROXYHYDROCINNAMATE, PARFUM, TRIGONELLA FOENUM-GRACUM SEED EXTRACT, POTENTILLA ERECTA ROOT EXTRACT, RUTIN, ASCORBYL PALMITATE, OLIGOPEPTIDE-5, CI 75810, LINALOOL, HYDROXYCITRONELLAL, CITRONELLOL

Available in retail version

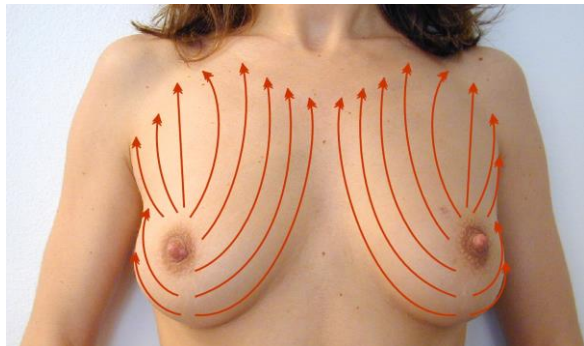

SINUSTON Crème pour le Seins

Ref. 312V
50 ml

Application

For best results always use **SINUSTON Crème pour les Seins** on clean dry skin, preferably after a bath or a shower. Apply the product with a light massage using semi-circular motions in an upward direction as shown in the picture.

Caution - Do not apply the cream on the nipples, especially during the lactation period.

To intensify the results, especially during the night, precede application of the cream with one of the following products:

BIOLASTON Lifting Gel for Body
BIOLASTON Phyto Huile pour le Corps

Use of the above products is especially beneficial in preventing and diminishing stretch marks.
