

BIOLASTON Fluide is a rich complex of amino acids, phyto extracts, and hydrating factors that profoundly tones the skin and helps slow the aging process. It stimulates the production of new collagen fibers to enhance firmness and flexibility of the skin.

BIOLASTON Fluide also protects the integrity of the epidermis and the connective tissue under stress conditions such as:

- solar exposure
- rapid growth
- pregnancy
- weight loss

that can lead to flaccidity or formation of stretch marks. It is an ideal soothing and revitalizing lotion for the entire body.

Recommended use

BIOLASTON Fluide is a professional products that is used in many **Methode Cholley** professional treatments to improve skin's elasticity and strength. It is readily absorbed, and for this reason it serves as a perfect diluting solution for:

- **BIOLASTON Masque** (Firming)
- **BIOVENAC Masque** (Heavy legs and capillaries)

For best results, use **BIOLASTON Fluide** as a tonic lotion immediately:

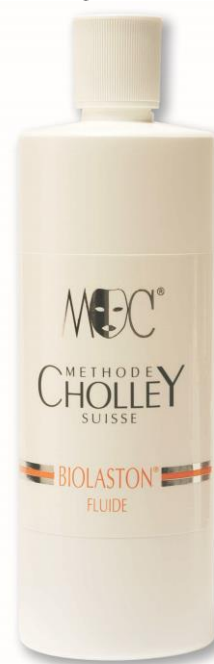

- after a mask or body peeling application
- before using a body cream or an oil.
