

The skin covering the décolleté is very thin and only slightly thicker than that of the eyelids, which is only about 0.5-0.6 mm. This part of the body is one of the most susceptible areas to sagging and formation of wide deep wrinkles as the result of chronological and photo-aging.

Compared to the face, this area is also lower in hydration and production of sebum due to fewer pores, sweat glands, sebaceous glands, and hair follicles (especially among women).

CHOLLEY Firming & Hydrating Mask for Décolleté is a powerful firming & anti-aging mask specifically developed for the skin of the décolleté to respond to problems of deep lines and wrinkles. It is a rich cocktail of selected phyto-extracts, amino acids, and natural moisturizing factors.

Thanks to a generous supply of precursors of collagen and elastin fibers, **CHOLLEY Firming & Hydrating Mask for Décolleté** accelerates the regeneration of new support tissues for a stronger, more resilient, and younger looking skin. It improves the strength and resistance of fragile skin, giving it a smooth and vibrant appearance to the décolleté.

Recommended use

CHOLLEY Firming & Hydrating Mask for Décolleté is best suited for very dry and mature skins to prevent & resolve the problems of deep lines & wrinkle on the décolleté.

Application

After a thorough cleansing of the décolleté with **BIOREGENE Lait**, pat dry the skin. Carefully cut & open the sachet and extend the mask on the entire décolleté area. Let the mask rest for 15-20 minutes before removing it. Gently massage any residue and pat dry the excess of fluid. Finish the treatment on the décolleté with the application of **PHYTOBIOTECH Firming Neck Cream**.
