

Damaged, dull, and tired skins are very common and evermore frequent due to many environmental and lifestyle factors. **CHOLLEY Skin Repair Program** is specifically developed for problems associated with these types of skins. It uses the latest Swiss technology and the highest quality phytobiological active ingredients to restore health, strength, and splendor of the skin.

Skin is constantly exposed to natural or man-made stress that over time undermine its strength and resistance. The problem is accentuated by inadequate care and overexposure to oxidants that rub skin's vitality and accelerate its aging process. Among these stressors we can list:

1. UV overexposure that weakens the collagen and elastin structure of the skin
2. Careless use of aggressive detergent, peeling, and skin bleaching products
3. Use of low-quality cosmetics and make-up products that obstruct pores and hair follicles
4. Smoking, a polluted environment, or excess use of make-up that deprive the skin of adequate oxygen
5. Acne and acne scars that damage the skin and leave it dry or flaky
6. Hormonal imbalance due to pregnancy, menopause, use of medications, or other factors.

The most common indicators of damaged skin are:

- A dull and opaque epidermis due to build-up of dead cells and excess keratin
- A gray-yellow tinge as a result of inadequate oxygenation due to smoking or living in a polluted environment
- A dehydrated epidermis that feels rough, flaky or even itchy
- Presence of blackheads that in some cases can be numerous
- Age spots and dark patches due to hyper-pigmentation caused by overexposure to UV radiations
- Acne scars

CHOLLEY Skin Repair Program brings back the natural equilibrium of the skin and gives it renewed strength and a healthy luminous look. The program can also be used for the treatment of acne rosacea or after aesthetic surgery.

- 1** Use **CHOLLEY Professional Makeup Remover** to remove eyes and lips make-up.

- 2** Cleanse face, neck, and décolleté with:
BIOREGENE Lait (dry, dehydrated, or couperose skins)
BIOCLEAN Lait (mixed, oily, or impure skins)
 Rinse with a lukewarm compress and gently pat dry the skin.

- 3** Apply the peeling mask **BIOREGENE Doux Peeling Crème** with two brushes. Let it rest for 5 - 8 minutes.

- 4** Remove the mask with a lukewarm compress and pat dry with **CHOLLEY Microfiber Gloves**.

- 5** To help reducing the appearance of scars after surgery and keep the skin of the scars smooth & well hydrated, apply **BIOREGENE Soothing Gel** only on the scars. Massage the product till it is fully absorbed.

- 6** Apply a first layer of **CHOLLEY Skin Repair Mask** and with the fingertips execute a massage on face, neck, and décolleté.

- 7** Apply a second layer of **CHOLLEY Skin Repair Mask** for the full consistent coverage of the treated area. Let the mask rest for 15 - 20 minutes.

- 8** Remove the mask with a lukewarm compress and pat dry with **CHOLLEY Microfiber Gloves**.

- 9** Apply **CHOLLEY Hyaluronic Ampoules** to fortify the skin and to accelerate the regeneration of collagen and elastin support fibers of the derma.

- 10** To combat hyper-pigmentation (age spots, dark patches, or melasma) apply **CHOLLEY PHYTOCELL Harmonizer** only on the problem spots. Massage the product till it is fully absorbed.

- 11** Complete the treatment with the application of **PHYTOBIOTECH Skin Repair Complex** on face, neck, and décolleté.

Estimated time:

50 minutes

Frequency:

Up to once a month
