

CELLIPEX Anti-Cellulite Program takes advantage of **CELLIPEX Masque**, a precious clay mask which is unrivaled in the treatment of stiff and fibrous forms of cellulite to restore tone and compaction to the tissues. The lipolytic action of the mask softens and diminishes cellulitis nodules, giving the skin a firm and consistent texture. Its rich reserve of phyto extracts has a diuretic effect that helps reduce water retention.

- 1** Mix about 50 gr. of **CELLIPEX Masque** with **BIOLASTON Fluide** in a ceramic bowl to obtain a creamy mixture. Before applying the mask, warm up the bowl in lukewarm water.
- 2** Place the client on her back on the bed. The treatment area extends from the abdomen down to the ankles.
- 3** Start the treatment by unblocking the terminus.
- 4** Using a microfiber glove and lukewarm water rinse the abdomen and the legs.
- 5** Execute **CHOLLEY Abdomen Massage** and then turn the client over.
- 6** With the palm of the hand apply the mask on the back side of the legs, beginning from the hip working down to the knee cavity.

- 7** Continue to spread the mask down to the ankle without leaving any uncovered spots.

- 8** When the whole leg is covered, begin to massage from the ankle upwards to the hip. Proceed upwards with firm but slow movements to stimulate the lymphatic flow.

- 9** Apply a second layer of the mask on the points that require greater care; then proceed to the other leg.

- 10** Turn the client on her back and repeat steps number 7 to 9 on the front part of the legs and the abdomen.
If the client does not show too much water retention, apply the mask down to about 10 cm below the knees, otherwise continue all the way down to the ankles.

- 11** Wrap each leg in the plastic sheet and cover the client with a blanket (don't use an electric one) to keep her warm. Leave the mask on for about 20 minutes.

- 12** Take off the plastic sheet and remove the mask with a lukewarm compress or a shower.
*You may use **CHOLLEY TPE Stîrgil** for a greater peeling effect and increased oxygenation of the tissues.*

- 13** Massage the treatment area with **CELLIPEX Emulsion**.

CELLIPEX

Anti-Cellulite Program

TN-2011-E

Estimated time:

50 minutes

Frequency:

Twice a week

Maintenance products for home use:

CELLIPEX Emulsion
