

CELLIPEX Elastic Bandage is the basis of **CELLIPEX Anti-Cellulite Bandage** treatment and is specifically designed to help renormalize the adipose tissue and restore the thermal equilibrium to accelerate local metabolism of fat. It also efficiently removes excess fluids and toxins from the tissues to minimize water retention.

- 1 Warm up **BIOLASTON Peeling pour le Corps** in lukewarm water.

- 2 Begin the treatment by unblocking the terminus.

- 3 Execute **CHOLLEY Abdomen Massage**.

- 4 Apply **BIOLASTON Peeling Naturel pour le Corps** and perform **CHOLLEY TPE Stirgil** on legs, thighs and buttocks.

- 5 Wrap each leg with a piece of **CELLIPEX Anti-Cellulite Bandage** (B101). Start wrapping just under the knees and proceed methodically towards the hips. Keep a firm grip on the bandage without over-stretching it.

- 6 Leave the client wrapped for a minimum of 20 minutes. In the last 10 minutes stimulate the lymphatic flow by massaging lightly over the bandage.

Optional– To enhance the action of the mask employ the pressotherapy apparatus if one is available.

7 Remove **CELLIPEX Bandage** and wipe off any excess residue with a microfiber glove.

8 Finish the treatment with **CELLIPEX Emulsion**. Apply the product with a light massage on the entire treatment area until it is completely absorbed.

9VC Just on the navel.
